Arc welding is one of the key processes in industrial manufacturing, with welders using two types of processes - gas metal arc welding (GMAW) and gas tungsten arc welding (GTAW). This new book provides a survey-oriented account of the modeling, sensing, and

automatic control of the GMAW process. Researchers are presented with the most recent information in the areas of modeling, sensing and automatic control of the GMAW process, collecting a number of original research results on the topic from the authors and colleagues. Providing an overview of a variety of topics, this book looks at the classification of various welding processes; the modeling aspects of GMAW; physics of welding; metal transfer characteristics; weld pool geometry; process voltages and variables; power supplies; sensing (sensors for arc length, weld

Until now very few books have been available that both define this rapidly evolving field and provide authoritative information for diagnosis and treatment. A comprehensive guide to understanding the many complexities of the vulnerable plaque and its role in interventional cardiology, *Handbook of the Vulnerable Plaque* defines vulnerable plaque, explains how it can be detected, and

Subsequent chapters on detection and diagnosis review biomarkers, MRI, intravascular thermography, intravascular ultrasound, and optical coherence tomography. It covers possible treatment options such as drug therapy, photodynamic therapy, and drug-eluting stents and concludes with chapters describing industry representation and device selection.
