A heart-rending but uplifting story of the human spirit's ability to prevail. From the day he is five-years-old and dropped off at his foster home of the next eleven years, Stephen is mentally and physically tortured. No one in the system can help him. No one can tell him if he has a family. No one can tell him why, with obvious African-American features, he has the last name of Klakowicz. Along the way, a single faint light comes only from a neighbor's small acts of kindness and caring and a box of books. From one of those books he learns that he has to fight in any way he can for victory is in the battle. His victory is to excel in school. Against all odds, the author succeeded. He attended college, graduated, became a successful corporate executive, and married a wonderful woman with whom he established a loving family of his own. Through it, he dug voraciously through records and files and found his history, his birth family and the ultimate disappointment as some family members embrace him, but others reject him. Readers won't be the same after reading this powerful story. They will share in the hurts and despair but also in the triumph against daunting obstacles. They will share this story with their family, with their friends, with their neighbors.

Chronicles the author's life and his hope and determination that helped to transform him from a neglected, orphaned toddler to a successful adult.

Chronicles the author's life and his hope and determination that helped to transform him from a neglected, orphaned toddler to a successful adult.

In this stirring follow-up to his memoir, Steve Pemberton gives practical encouragement for how you can be a "human lighthouse" for others and through these inspiring stories will renew your hope for humanity. Our polarized, divisive culture seems to be without heroes and role models. We are adrift in a dark sea of disillusionment and distrust and we need "human lighthouses" to give us hope and direct us back to the goodness in each other and in our own hearts. Steve Pemberton found a lighthouse in an ordinary man named John Sykes, his former high school counselor. John gave Steve a safe harbor after Steve escaped an abusive foster home and together they navigated a new path that led to personal and professional success. Through stories of people like John and several others, you will identify how the hardships you have overcome equip you to be a "human lighthouse," inspiring those around you. The humble gestures of kindness that change the course of our lives can shift the course for America too. With a unique vision for building up individuals and communities and restoring trust, The Lighthouse Effect opens your eyes to those who are quietly heroic. You will reflect on the lighthouses in your own life and be reminded that the greatest heroes are alongside us--and within us.

Bauman urges us to think in new ways about a newly flexible, newly challenging modern world. In an era of routine travel, where most people circulate widely, the inherited beliefs that aid our thinking about the world have become an obstacle. He challenges members of the [knowledge class] to overcome their estrangement from the rest of society.

In this innovative study, Crystal Sanders explores how working-class black women, in collaboration with the federal government, created the Child Development Group of Mississippi (CDGM) in 1965, a Head Start program that not only gave poor black children access to early childhood education but also provided black women with greater opportunities for political activism during a crucial time in the unfolding of the civil rights movement. Women who had previously worked as domestics and sharecroppers secured jobs through CDGM as teachers and support staff and earned higher wages. The availability of jobs independent of the local white power structure afforded these women the freedom to vote in elections and petition officials without fear of reprisal. But CDGM's success antagonized segregationists at both the local and state levels who eventually defunded it. Tracing the stories of the more than 2,500 women who staffed Mississippi's CDGM preschool centers, Sanders's book remembers women who went beyond teaching children their shapes and colors to challenge the state's closed political system and white supremacist ideology and offers a profound example for future community organizing in the South.

Abandoned at birth and shuffled from foster home to foster home, Sam Merrin has never wanted children of her own. Nevertheless, she feels passionate about giving the unborn the same chance at life she had been given when something, or someone, had led her own mother to both give birth and leave her on a church doorstep rather than have an abortion or simply throw her away. Sam's convictions will be put to the test, however, when Cassie, a cynical pregnant woman, gives her an ultimatum: either Sam legally adopts her baby or else Cassie will get an abortion. Can Sam give up life as she knows it for another woman's child she never wanted? How can she not, though? When you're passionate in your beliefs, sacrifices are sometimes required, and Sam soon realizes she must be willing to make a huge one if Cassie's baby is to have A Chance for Life. As unexpected motherhood becomes a reality, Sam learns the depth of a mother's love and how to accept the love others are so ready to give.

Meet Patrick Cooper! desperately down on his luck, and head-over-heels in unrequited love with his best friend Bridget. Meet Bridget's sister, Emma Donovan -eternally single maker-of-cakes for many a happy couple, whilst never making it down the aisle herself. Emma has four younger sisters, all of whom are married or getting married, and an Italian mother who can't understand what is [wrong] with her eldest daughter, who seems to be stranded on the shelf. Despairing of her own ability to find a suitable husband, Emma agrees to be part of a compatibility project to get married at first sight. Meanwhile Cooper is struggling to get over his crush on Bridget and seems destined to stay firmly on the shelf too. Perhaps it's time his fate was taken out of his hands... Is happily-ever-after just about daring to take a chance, or do you need some extra magic to make love last? Join Beth Moran, Cooper and the Donovan sisters on this life-affirming and uplifting tale of love, family, friendship, and risking it all for happiness. Praise for Beth Moran: 'Life-affirming, joyful and tender.'Zoe Folbigg 'Every day is a perfect day to read this.'Shari Low 'A British author to watch.'Publisher's Weekly 'A wonderfully warm-hearted story full of love and laughter.'Victoria Connelly

The riveting account of how one brigade turned Iraq's most violent city into a model of stability Colonel Sean MacFarland's brigade arrived in Iraq's deadliest city with simple instructions: pacify Ramadi without destroying it. The odds were against him from the start. In fact, few thought he would succeed. Ramadi had been going steadily downhill. By 2006, insurgents roamed freely in many parts of the city in open defiance of Iraq's U.S.-backed government. Al-Qaeda had boldly declared Ramadi its capital. Even the U.S. military acknowledged the province would be the last to be pacified. A lanky officer with a boyish face, MacFarland was no Patton. But his soft voice masked an iron will and a willingness to take risks. While most of the American military was focused on taming Baghdad, MacFarland laid out a bold plan for Ramadi. His soldiers would take on the insurgents in their own backyard. He set up combat outposts in the city's most dangerous neighborhoods. Snipers roamed the dark streets, killing al-Qaeda leaders and terrorist cells. U.S. tanks rumbled down the streets, firing point blank into buildings occupied by insurgents. MacFarland's brigade engaged in some of the bloodiest street fighting of the war. Casualties on both sides mounted. Al-Qaeda wasn't going to give up easily. Ramadi was too important. MacFarland wasn't going to back down either. The two sides had fought to a stalemate. At least until Sheik Abdul Sattar Bezia al-Rishawi emerged. A minor tribal leader, Sheik Sattar had earned his reputation as a smuggler. He carried a large six-shooter on his hip and had a taste for whiskey. But he hated al-Qaeda and was watching MacFarland's brigade as they battled militants toe-to-toe. This was a different group of Americans, Sattar thought. Sattar approached MacFarland and said he was ready to join with the Americans and fight al-Qaeda. Other officers might have kept their distance. MacFarland didn't hesitate. He promised Sattar his support. What followed was one of history's unlikeliest -- and most successful -- partnerships. Together, the Americans and Sattar's growing band of fighters drove al-Qaeda from Ramadi. A Chance in Hell is compelling tale of combat leadership and how a handful of men turned the tide of war at a time when it looked most hopeless.

A groundbreaking book that boldly claims the key to success in business is not talent, connections, or ideas, but the ability to persuade people to take a chance on potential. No one ever makes it alone. But how come some people can get investors to believe in their ideas while others/sometimes with even better ideas/fall flat? What is it about certain people that make us want to take a bet on them? What is it that makes them backable? As it turns out, it's not what you think. Backability is not driven by having the best experience, the finest pedigree, or the most innovative ideas. In fact, many highly successful people are backed long before they are qualified. We tend to view these people as lucky. But the decision to back them is neither an accident nor a mistake, and rarely the result of good luck. Drawing from his own business experience, countless interviews with some of tech's biggest innovators, and compelling case studies of classic success stories like Howard Schultz and Elon Musk, Gupta breaks down the six qualities of backable people that get others to take a bet on them. Backable pulls back the curtain on the illusory x factor that some people just seem to have and instead offers concrete tools like crafting the right pitch and appropriately scaling a project's vision. Anyone from aspiring entrepreneurs to start up stars can master these skills and jumpstart their next big idea.
