Fuel is injected directly into the cylinder (or into a prechamber which is connected to the cylinder for indirect injection engines), just before (some 5 CAD) the desired start of combustion. High pressure injection produces small, high velocity fuel droplets which vaporize rapidly in

Recall some of the primary components of an internal combustion engine. Recognize elements of the fuel system, and how the elements relate to the engine. Understand some common components of the ignition system. Recall the elements in induction and exhaust systems.

Distinguish between the various processes in the cranktrain and valvetrain systems. Recognize the automotive elements that provide cooling and lubrication.
