This directory contains information on all the companies listed on the London & Irish Stock Exchanges. It also includes information on trustees, taxation, registrars, auditors, solicitors, overseas stock exchanges and more.

An examination of the causes and effects of emotions at work, seeking to extend existing theories to consider implications for the management of emotions. The contributors explore the practical issues raised when organizations are studied as places where emotions are suppressed, aroused or used.

Not Included: Student Data DVD for Using Sage 300 ERP 2017, 1/e COMPONENT ITEM ONLY. This textbook has been written for students who want to become familiar with the Sage 300 ERP 2017 software (System Manager, General Ledger, Tax Services, Bank Services, Accounts Payable, and Accounts Receivable). It is designed to enable students to learn Sage 300 ERP 2017 as easily as possible.

Serving as a general, nontechnical resource for students and academics, these volumes provide an understanding of the development of business as practiced around the world.

The Digital Economy Report 2019 on "Value creation and capture: Implications for developing countries" takes stock of recent trends in the global digital landscape and discusses the development and policy implications of data and digital platforms. A key feature of the evolving digital economy is the increasing role of digital data as an economic resource, together with digital platforms as new influential actors, with capacity to collect, process, analyze and monetize data. The report considers policy options for countries to help ensure that they capture a fair part of the value created in the digital economy for inclusive development. Key issues include the market impact of emerging technologies and digital platforms, the impact on smaller businesses in developing countries and the implications for infrastructure, entrepreneurship, skills, competition, data flows, data protection, taxation and other relevant policies.

Research Methods for Business: A Skill-Building Approach is a concise and straightforward introduction for students to the world of business research. The skill-building approach provides students with practical perspectives on how research can be applied in real business situations. Maintaining Uma Sekaran' s popular and accessible style of writing, Roger Bougie draws upon his extensive experience in the field to present an up-to-date guide on business research which is ideal for aspiring managers. The seventh edition has been fully revised and updated to include cutting-edge examples and enriched pedagogical features designed to improve student learning outcomes. There is now an increased emphasis on the relationship between the scientific and the pragmatic approaches to research, while the key concepts are explored and applied to real-life research throughout the book.

This—revised and enhanced—book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital, executing a financing strategy, establishing debt and dividend policies consistent with the company's strategy and environment, choosing between dividends and stock repurchases, managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/CWA students and executive education programs.
