The Necessary Revolution: How Individuals And ... Mexican Revolution (1910 – 20), a long bloody struggle among several factions in constantly shifting alliances which resulted ultimately in the end of the 30-year dictatorship in Mexico and the establishment of a constitutional republic. It began with dissatisfaction with the elitist policies of Porfirio Diaz.

Imagine a world in which the excess energy from one business would be used to heat another. Where buildings need less and less energy around the world, and where “ regenerative ” commercial buildings – ones that create more energy than they use – are being designed. A world in which environmentally sound products and processes would be more cost-effective than wasteful ones. A world in which corporations such as Costco, Nike, BP, and countless others are forming partnerships with environmental and social justice organizations to ensure better stewardship of the earth and better livelihoods in the developing world. Now, stop imagining – that world is already emerging. A revolution is underway in today ’ s organizations. As Peter Senge and his co-authors reveal in The Necessary Revolution, companies around the world are

boldly leading the change from dead-end “business as usual” tactics to transformative strategies that are essential for creating a flourishing, sustainable world. There is a long way to go, but the era of denial has ended. Today’s most innovative leaders are recognizing that for the sake of our companies and our world, we must implement revolutionary—not just incremental—changes in the way we live and work. Brimming with inspiring stories from individuals and organizations tackling social and environmental problems around the globe, **THE NECESSARY REVOLUTION** reveals how ordinary people at every level are transforming their businesses and communities. By working collaboratively across boundaries, they are exploring and putting into place unprecedented solutions that move beyond just being “less bad” to creating pathways that will enable us to flourish in an increasingly interdependent world. Among the stories in these pages are the evolution of Sweden’s “Green Zone,” Alcoa’s water use reduction goals, GE’s ecoimagination initiative, and Seventh Generation’s decision to shift some of their advertising to youth-led social change programs. At its heart, **THE NECESSARY REVOLUTION** contains a wealth of strategies that individuals and organizations can use—specific tools and ways of thinking—to help us build the confidence and competence to respond effectively to the greatest challenge of our time. It is an essential guidebook for all of us who recognize the need to act and work together—now—to create a sustainable world, both for ourselves and for the generations to follow.

The definitive guide to maximizing ideas from employees presents true stories of management encouraging workers to share their ideas with profitable results for everyone. Reprint.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more

profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

“ One of the seminal management books of the past seventy-five years. ” —Harvard Business Review This revised edition of the bestselling classic is based on fifteen years of experience in putting Peter Senge ’ s ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization ’ s ability to learn faster than the competition. The leadership stories demonstrate the many ways that the core ideas of the Fifth Discipline, many of which seemed radical when first published, have become deeply integrated into people ’ s ways of seeing the world and their managerial practices. Senge describes how companies can rid themselves of the learning blocks that threaten their productivity and success by adopting the strategies of learning organizations, in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create the results they truly desire. Mastering the disciplines Senge outlines in the book will:
